TO WHOMSOEVER IT MAY CONCERN

Gaurav worked with me on Bot Client project during his internship with Microsoft. As part of the scope of the project, team had to research on various Bot frameworks, Natural language processing concepts, cognitive services, web interface, Azure and develop a solution to meet the business requirements.

Gaurav did great job to understand the concepts, try proof of concept and then implement it to solve the business scenario. He played pivotal role in the project especially in the Bot framework, NLP and cognitive services part of the solution.

As a team, the whole gang collaborated very well and came up with the solution as per planned schedule.

I will recommend Gaurav to any team which wants to explore new concepts, technologies and implement the same to solve a business problem.

Thanks Gaurav for all your effort, hope we can work together again sometime in future.

Regards,

Rajesh Nair | Microsoft Services
